Toolkit, DOM Manipulation, Html, Css, Bootstrap, Tailwind Css, Material

UI, Ant Design, Git

EDUCATION

Bachelor's in Software Engineering

Daffodil International University

2017 - 2021 Dhaka, Bangladesh

PROJECTS

Food App

<https://idyllic-ganache-639f56.netlify.app/>

This is a food app, where user can search the food of their choice and search according to the price range. And they can add to cart. In the order section, their payment amount will count. But the order confirmation is still left. I will finish it in a few days.

Technologies : React.js, Tailwind Css, React-router-dom, Context Api

Service App

<https://dazzling-cassata-b7ce17.netlify.app/>

This app is made with the basic section of any service based company. Here I mainly made it for Scss design based responsive design.

Technologies : React.js, Scss, React-router-dom

Fashion Website

<https://cozy-pika-07b29e.netlify.app/>

This app is designed to imagine the website of any fashion brand. It is mainly focused on design and made to explore Material UI.

Technologies : React.js, React-router-dom, Material UI

Video App

<https://guileless-smakager-5d4b4f.netlify.app/>

Here user can watch videos. White and black two moods are used here. This app is mainly made to explore Chakra UI.

Technologies : React.js, React-router-dom, Chakra UI

Barnick

I am currently building a web application called Barnick for internal use of a press company. I am doing the front-end alone and contributing partially to the back-end development also.

Front-end Technologies : React.js, React-router-dom, Context Api, Bootstrap, Axios

Back-end Technologies : Django, Django REST Framework, JWT Token
